Centre for Industrial Design (Open Design School)

DESIGN ENGINEERING

CONTINUOUS ASSESSMENT CARD

COLLEGE NAME: Government Engineering Collage, Gandhinagar COLLEGE CODE: 013	
SUBJECT NAME: Design Engineering	
SUBJECT CODE: 3160001	SEMESTER: 6th
BRANCH: Information Technology	ACADEMIC YEAR: 2024-25

TEAM NAME:	TEAM ID: 826122
PROJECT TITLE/DOMAIN: GSRTC PASS GENERATION AND BUS TRACKING SYSTEM	

SR. NO.	TEAM MEMBER'S NAME	ENROLLMENT NO.
1	Patel Bhumi Mukundbhai	220130116039
2	Gracy Rakesh Rathod	210130116065
3	Ayushi Bhavesh kumar Prajapati	220130116051
4	Rinki Balbirchand Devi	220130116078

INTERNAL GUIDE NAME: PRASHANT C
INTERNAL GUIDE SIGN:

Head of Department College Seal

<u>MONTHLY ASSESSMENT - I</u> (Observation, Empathy and Define Phase)
(DATE :___/___/___)

1. Why students/team have taken above mentioned domain? (Please specify the reason)

   (Note: For more content or information, one may attach additional pages to this card.)

   We Choose "The GSRTC Online Bus Tracking And Pass Generation System" because of the following reason:

   Social Impact : The GSRTC online bus tracking and pass generation system are essential for students.

   Community Engagement :Working on such a project involves collaboration disabled communities caregivers, and organization focused on accessibility

   Personal Connection : Some students may have personal experiences or connection about this project.

2. How frequently student team has gone for observation on field, mention with date, place, time etc.? Which are the key observations that they have noticed?

   The student team conducted field observation on a monthly basis over a period of three months in various places i.e. bus stand key observations could include issues with real-time tracking accuracy, user interfaces feedback, or challenges faced by users during ticket generation. These observations aid in refining and improving the GSRTC online bus tracking and ticket generation system

3. A. How many interactions/interviews team members have done?

   The students team conducting 5 to 10 interviews. However, multiple interviews or interactions with different stakeholders, such as users, drivers, or administrators, would likely be necessary to gather a comprehensive understanding of their perspectives and needs regarding the GSRTC system

   B. Who are the user and various stakeholders on domain? Describe their persona (Name, age, occupation/education, roles and responsibility etc.)

   Stakeholders usually include passengers, bus operators, GSRTC management, and potentially government regulatory bodies. Their roles can vary widely, from passengers expecting service to bus operators.

   Peron: Jai Age : 20 Occupation : Student

   C. List out the questions asked by team while having observation and interview?

   Questions asked by team while observation and interview are :

   How do you find the current online tracking system's accuracy?

   What challenges do you face while generating a pass online?

4. What is something special/random/unusual (i.e. activity, environment, interaction, object or user) team have observed at the domain? Please elaborate the conditions with photographs if available.

Teams might observe unique scenarios like high demand during certain times, user behaviors in accessing the system, special events impacting travel, or infrastructure challenges affecting the system's functionality. Photographs or detailed conditions aren't available, but capturing unique situations aids in understanding real-world dynamics for system enhancement.

5. Enlist any five major problems observed by your team in the respective domain. Mention any one for which you have empathize user the most and which might become your problem statement. Give reasons of selection of particular problem/issue based on empathy.

Common issues in online bus tracking systems might

1. Accuracy and Reliability
2. User Interface Complexity
3. Technical Glitches
4. Customer Support
5. Accessibilty Challenges

6. Define your "PROBLEM DEFINITION" for the project as per below format. Which might be refine till end of Ideation phase if you wish.

Passengers (1. Real Time Tracking information) GSRTC Management 2. Timely (1. Fleet Monitoring 2.Route Optimization)
