MONTHLY ASSESSMENT _ II (Ideation and Product Development Phase)

DATE :___/___/___)

1. Explain briefly Ideation thought process and efforts of your team to reach ideas for listed problems.

   The ideation process for the GRSTC online bus tracking and pass generation system likely involved brainstorming sessions, market research, and discussions to address listed problems. The team might have analyzed user needs,

   existing solutions, and technology trends to generate innovative ideas. Collaborative effortsl creative thinking, and problem solving strategies could have been utilized to explore various concepts and approaches to tackle the identified challenges._

2. Enlist any five effective ideas to address the probable listed problems with reason.

   1. Real-Time GPS Tracking: Implement a robust real-time GPS tracking system for buses.

   2. Offline Mode for Pass Generation: Integrate an offline mode for pass generation to address potential connectivity issues.__

   4.Multi-Platform Compatibility: Ensure Compatibility across various devices and operating systems to address potential user accessibility issues.

   3. User Feedback Mechanism: Include a user feedback mechanism in the app to gather input on any issues or suggestion.

   5 Security Measures for Pass Generation: Implement robust security measures for pass generation to prevent unauthorized access and fraudulent activities.

3. Explain the most effective possible solution proposed for the problem.

   The most effective solution for the GRSTC online bus tracking and pass generation system could involve implementing a robust, real-time GPS tracking system integrated with a user- friendly app. This system would allow passengers to track bus locations, estimate arrival times, and facilitate easy pass generation and payment options within the app.

   Additionally, incorporating features like notifications for delays, route changes, and an intuitive interface would enhace_ user experience and overall efficiency.

4. Explain the features, functions and working principles/technology/pattern of your proposed solution.

   Features: 1 Real-time bus tracking; 2. Pass Generation; 3. User Authentication; 4. Route Information; 5. Payment Integration Function are also same as features. Working Principles/ Technology/ Pattern: 1. GPS Technology: Utilized for real-time bus tracking. 2. Mobile App/website: Interface for passengers to access bus tracking and pass generation features._ 3. Database Management; 4. Secure Communication Protocols; 5. Cloud Based Infrastructure._

5. Enlist major advantages and disadvantages (atleast three) of the proposed solution.

Certainly here are some major advantages and disadvantages of the proposed GRSTC online bus tracking and pass generation system:

Advantage 1. Real time tracking: Enables passengers to track buses in real time, enhancing convenience and reducing wait times.__

2. Improved Efficiency: Streamlines the ticketing process, reducing queues and administrative burden.

Disadvantages: 1. Dependency on Technology: System failures or technical issues could disrupt services. 2. Costs: Implementing and maintaining such a system might involve significant expenses. 3. Privacy Issues: Tracking systems might raise privacy concerns among users.

6. Briefly mention refinement on PDC based on User/Stakeholder's feedback on your concept.

Refinements to the PDC based on user/ stakeholder feedback could include enhancements to the user interface for easier navigation,

adding real time notifications for bus arrivals/ departures , incorporating a feedback mechanism for users to report issues or suggest improvements, and optimizing the pass generation system for smoother user experience. Additionally, integrating more

accurate GPS tracking and improving security features might be considered based on stakeholder's inputs.
